## 90° DB09/HD15 Low Profile Mold

Immediate Release

### Features and Benefits:

- Fully over molded back shells
- Easily accessible thumbscrew hardware
- 90° hood design for space restricted installation environments.

### Applicable Markets:

- Premise Wiring
- Speciality Applications
- Modular Connectivity

### Description:

Anaheim, California, March 2007 - Shaxon Industries low profile DB9/HD15 molded hood provides a 90° exit for serial, svga, or other cable types requiring a bottom or top exit and compact strain relief footprint. Standard thumbscrews or specialized hardware are available. Shaxon Industries offers a variety of custom options for low profile DB9/HD15 , including: custom cable length, low profile 90 degree DB9/HD15 to various other connectors, low profile 90 degree DB9/HD15 terminated on various Shaxon or customer specified cable types. Shaxon Industries fully molded back shell ensures rugged, lasting performance in indoor and outdoor applications.
