

KEYSTONE JACKS

Shaxon **KEYSTONE JACKS** are designed as a termination point for inside wiring, commonly at the workstation outlet. Keystone jacks can also be used in keystone style panels to provide a flexible and customizable patching field. A minimal shoulder design allows them to fit side by side even in high density keystone patching fields.

Multiple Colors

Features include:

- Multiple colors for various port designation requirements
- Compatible with any industry standard keystone port
- Minimal shoulder for high density installations
- Designed to snap into Keystone Panels or Keystone plates
- Meet or exceed applicable specifications
